How our school is made up.

Our school is made up of 684 pupils and the teaching staff is made up of 74 units. The non-teaching staff is made up of 9 auxiliaries and 4 administrative collaborators who work under the guidance of the Director of Administrative Services.
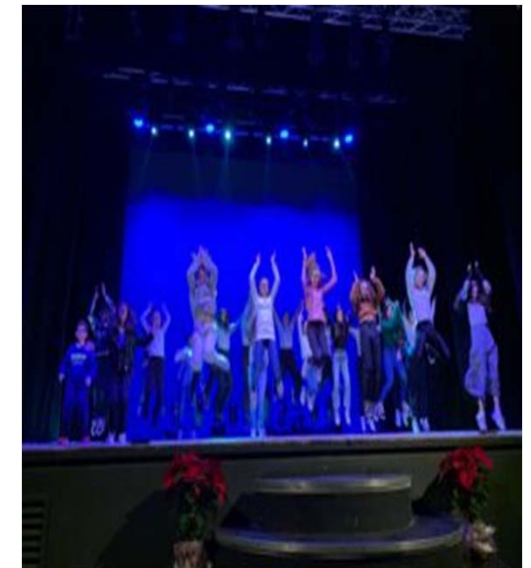

The projects that our school offers.

Our school offers a lot of fun but also educational projects, some of these are drama and music, the sportinge project, but also courses to catch up with Italian, Mathematics and Foreign Languages. There are also several projects such as gardening; and, in order to learn how to understand better, we have done several posters, including that of Dante Alighieri's Divine comedy.

- Drama and Music

- The Musical project

- The sporting project,

- Remedial classes of Italian, Mathematics and Foreign Languages.

- Projects such as gardening.....

- Educational playcards

- Rules against Covid

Drama and Music Projects

The Drama and Music Projects, by teachers: R. Sciuto with the Musical "Tre fate ed una principessa" ; teacher C. Bazzano with very instructive classes about Pirandello's "La Patente": teacher R: Leonardi with the presentation of an object for a"science class", "Lo strano scherzo del DNA". And finally another Musical edited by teachers P. Arcifa and C. Galvagno i entitled "Vivi il tuo Sogno".

The Music project

One of the flagship of our school is "The Musical class", in fact the school allows students to learn how to play an instrument and with different concerts how to be able to show parents their "progress", thanks to the teachers: Massimo Vasta, who teaches piano, teacher Marcella Catanzaro who teaches clarinet ,   Yuri Furnari who teaches trumpet and trombone and teacher Salvo Visalli who teaches French horn.

The sporting project

In addition to Drama and Music project, there is another educational but also fun project; learning how to play volleyball. It includes four afternoon meetings, on Wednesdays. It's a very fun project.

The remedial classes of Italian, Mathematics and Foreign Languages.

Our school also offers pupils courses to catch up with some subjects, namely Italian, Mathematics and Foreign Languages, such as English to bridge the gaps.
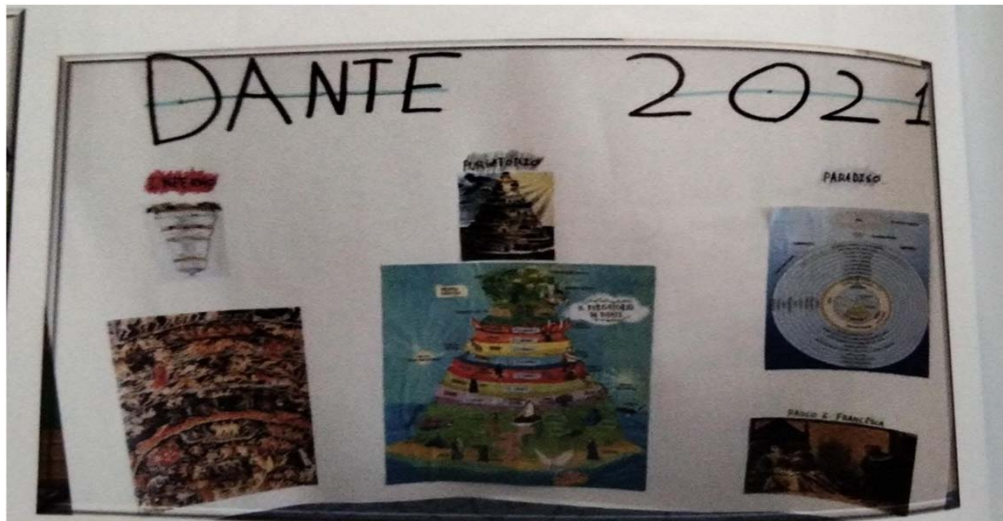

Projects such as gardening

Teacher Sergio Reina, in the course of scientific enhancement, gave life to the "garden at school" project. It is a way to learn how to develop manual skills, the real and practical relationship with nature. You can learn the concept of diversity, cooperation, a sense of responsibility. The concept of time and space is developed. The structure of a school garden reconnects pupils with the origins of life. You learn some principles of education and civilization, learning how much work is behind what they find in a supermarket.

Dante's Commedia

Class 2 ·D in honour of the 700th anniversary of Dante's death, wanted to deepen the study of the Divine Comedy in various ways: They drew up posters. They saw a show called "Dante's Inferno" by Giovanni Anfuso and they saw the actor Roberto Benigni recite some verses of the Divine Comedy.

Anti- covid rules

All the school staff, since last year they have made us understand many things and have explained to us all the necessary ways to behave during the pandemic: at school you must wear the facial mask , to avoid the spread of the infection, you have to clean your hands frequently, you mustn't lend your school things and you mustn't borrow other students' things. A distance of at least one metre must be maintained, always keep a mask and a gel at hand, in your rucksack; ventilate your classroom at every change of classes ; sneeze in the crook of the elbow and notify your teacher in case you feel bad. These are all the anti-contagion rules that they have taugh us and that we have learned so carefully.

È OBBLIGATORIO INDOSSARE LA MASCHERINA

WE HOPE YOU LIKED OUR SCHOOL AND WE HOPE SO MUCH THAT YOU WILL COME TO VISIT US IN THE NEXT OPEN DAYS! CLASS 2°L
